OBJECTIVE

Having 5year'swork experience working in the field of IT and looking forward to an exciting and challenging career with an organization that provides excellent working environment and opportunities.

PROFESSIONAL SUMMARY:

- ❖ Certified **SnowPro Core**.
- ❖ Having better understanding of Snowflake architecture and processing.
- ❖ Good exposure on implementing Snowflake stored procedures and automation functionalities such as Streams and Tasks.
- ❖ Hands-on experience in bulk loading and unloading data into Snowflake tables.
- ❖ Knowledge on implementing Snow pipe for continuous data ingestion.
- ❖ Extensively used SnowSQL for data load and having sound knowledge in Stages.
- ❖ Experience with snowflake cloud data warehouse and AWS S3 / AZURE bucket for integrating data from multiple source system.
- ❖ Experience in building SnowPipe.
- ❖ Worked on AWS data pipeline to configure data loads from S3 data.
- ❖ Writing advanced SQL scripts as per the business plan to transform the data.
- ❖ Used Time Travel and Fail Safe for data recovery.
- ❖ In-Depth understanding of Snowflake Multi-cluster ware housing, Multi-cluster Size and Credit Usage.
- ❖ Experience on working with various data formats like XML, JSON, TSV, TXT files.
- ❖ Supervise ETL jobs and workflows to guarantee their successful and timely execution, including data extraction, transformation, and loading processes.
- ❖ Swiftly investigate and rectify any failures or errors that occur during ETL job processing, particularly during data transformations.
- ❖ Experience on Airflow DAGs.

CERTIFICATIONS AND TRAINING:

- ❖ Snowflake SnowPro Core Certification

WORK EXPERIENCE

ATMECS Technologies Pvt Ltd.

Sr software engineer (Production & User support)

02 April 2024 to 15 Aug 2024

Project Description: Intutive Surgicals

Tools: Snowflake, Airflow DAGs, Tableau and Service now

Responsible for maintaining and optimizing data pipelines using Snowflake and Apache Airflow, as well as providing comprehensive user support and assistance. Worked on SnowSQL and Snowpipe

- ❖ Monitored the performance and execution of User-Defined Functions (UDFs) within Snowflake to ensure optimal performance.
- ❖ Analyzed query performance and execution plans to identify bottlenecks and optimize UDFs for efficiency.
- ❖ Implemented logging and alerting mechanisms to proactively identify and resolve UDF-related issues.
- ❖ Collaborated with the data engineering team to enhance UDF functionality and maintain best practices.
- ❖ Supervised the execution of ETL (Extract, Transform, Load) workflows and scheduled jobs within Apache Airflow.
- ❖ Ensured the reliability and accuracy of data pipelines by monitoring task failures, retries, and execution times.
- ❖ Developed and maintained dashboards for real-time monitoring of Airflow jobs, providing visibility into pipeline health and performance.
- ❖ Automated alerting and notification systems to quickly address any job failures or performance issues.
- ❖ Provided technical support to end-users, addressing issues related to data access, query performance, and pipeline errors.
- ❖ Assisted users in writing efficient SQL queries and utilizing Snowflake's advanced features effectively.
- ❖ Conducted training sessions and created documentation to empower users with the knowledge to independently troubleshoot common issues.
- ❖ Worked closely with stakeholders to understand their data needs and ensured timely and accurate data delivery.
- ❖ Worked on Airflow DAG Analysis

Vizag Amogh Project Management Pvt Ltd

Snowflake Developer / Data Engineer

Dec 2020 to 28th Dec 2023

Project Description: Western asset Management

Tools: Snowflake, Informatica and Service now

Western Asset is a globally integrated fixed-income manager, sourcing ideas and investment solutions worldwide. Foster a culture in which risk management is a critical component of successful portfolio management. Integrating risk management inputs into the portfolio construction process strengthens its effectiveness. Robust communication and escalation procedures underpin the independence and transparency of risk management.

- ❖ Worked on SnowSQL and Snowpipe
- ❖ Converted Talend Joblets to support the snowflake functionality.
- ❖ Creating Transformer Pipelines and Data Collector Pipelines
- ❖ Test, Validate and Deploy the Pipelines
- ❖ Created Snowpipe for continuous data load.

- ❖ Used COPY to bulk load the data.
- ❖ Created data sharing between two snowflake accounts.
- ❖ Created internal and external stage and transformed data during load.
- ❖ Redesigned the Views in snowflake to increase the performance.
- ❖ Created Talend Mappings to populate the data into dimensions and fact tables.
- ❖ Consulting on Snowflake Data Platform Solution Architecture, Design, Development and deployment focused to bring the data driven culture across the enterprises
- ❖ Building solutions once for all with no Band-Aid approach.
- ❖ Implemented Change Data Capture technology in Informatica in order to load deltas to a Data Warehouse.

Symbiosys Technologies

Software Trainee

DEC 2019 to NOV 2020

Project description: Cisco Devices

Responsible for Level 1 Troubleshooting of Cisco Devices for delivering uninterrupted service to the clients on data network Also, the various alerts being raised with proper solution, by troubleshooting, by forwarding it to the higher level for further diagnosis, by remote access or contacting the field engineer and thereby solving the issue

- ❖ Management of customer networks and providing a rapid response to customer raised incidents and problems
- ❖ Monitoring and Management of the network at various remote locations using the monitoring tool Solar winds
- ❖ Perform analysis and diagnosis on complex networking problems, identify issues, and resolve faults
- ❖ Responsible for basic troubleshooting network routers to isolate the trouble and take appropriate action to resolve
- ❖ Provides supports to the clients for delivering uninterrupted services
- ❖ Working with vendors and onsite Field Engineers to troubleshoot issues and coordinate dispatches
- ❖ Liaise with Upstream Service providers, Peers and Internet Exchanges to ensure efficient operation of IP network
- ❖ Communicate with other Network Operation Centre's and escalate where necessary both internally and externally in order to meet SLAs
- ❖ Handle escalations and be a focal point to all IP service-related queries
- ❖ Maintain proper documentation, case history in service tickets
- ❖ Ensure timely follow up with customers via e-mails or phone calls.

ACADEMIC DETAILS:

- ❖ Diploma in Electronics Communication and Engineering from SBTET 2014
- ❖ B.Sc (Computer Science) (2018) from Annamalai University
